

About 150 million years ago, in a time called the Jurassic, dinosaurs ruled the earth. These dinosaurs included the stegosaurus, with fan-shaped plates on its back, and the huge, long-necked brachiosaurus. The allosaurus was a meat-eating dinosaur that would hunt and bring down dinosaurs larger than itself. The ancestors of the turtle were also already in existence. By 64 million years ago, the dinosaurs had all died out. The reason why they vanished is still a mystery.

Print out this pattern, cut out the pieces, and assemble as shown in the diagram. It may be easier to cut widely around each part first, then trim the parts carefully. Don't worry if you can't cut too closely around some of the fine details.
